

**Himachal Pradesh  
Public Service Commission.**

**PUBLIC NOTICE**

Whereas, the HPPSC has commenced the procedure of conducting of Computer Based Test for screening of candidates for various recruitments in order to expedite the recruitment process. The introduction of Computer Based Test has reduced the time schedule of conducting screening Test & declaration of result by about 3 months.

Whereas, the present total capacity of this Commission is to conduct the CBT of about 1300 candidates in one session . It has been observed that in most of the examinations the number of candidates exceeds the total capacity of computer terminals available. In order to take benefit of information technology tools and to expedite recruitment process, HPPSC envisages to conduct most of the screening tests through CBTs. As the infrastructure is inadequate, HPPSC has decided to adopt the practices undertaken by various other recruitment agencies to meet out the short fall of infrastructure which involves the conduct of same examination in multiple sessions with different question papers. Matter was examined by full Commission after deliberation it has been decided that w.e.f. 01-05-2019 Computer Based Test(CBT) shall be conducted in single slot with same question paper and in different slots with different set of question papers depending upon the total number of candidates who have to take the test and the number of computer terminals available to the Commission at the particular date for CBT.
