TEST BOOKLET SERIES

TEST BOOKLET PRPL. (ITI) 2015

Time Allowed : 2 Hour	's]	[Maximum Marks: 100
	. All questions carry equal marks	
	INSTRUCTIONS	
1. Immediately after	r the commencement of the examination,	you should check that test booklet

- Immediately after the commencement of the examination, you should check that test booklet does not have any unprinted or torn or missing pages or items, etc. If so, get it replaced by a complete test booklet.
- Encode clearly the test booklet series A, B, C or D as the case may be in the appropriate place in the answer sheet.
- 3. Write your Roll Number only in the box provided alongside.

 Do not write anything else on the Test Booklet.
- This Test Booklet contains 100 items (questions). Each item comprises four responses (answers). Choose only one response for each item which you consider the best.
- 5. After the candidate has read each item in the Test Booklet and decided which of the given responses is correct or the best, he has to mark the circle containing the letter of the selected response by blackening it completely with Black or Blue ball pen. In the following example, response "C" is so marked:
 - (A) (B) (D)
- 6. Do the encoding carefully as given in the illustrations. While encoding your particulars or marking the answers on answer sheet, you should blacken the circle corresponding to the choice in full and no part of the circle should be left unfilled.
- 7. You have to mark all your responses ONLY on the ANSWER SHEET separately given according to 'INSTRUCTIONS FOR CANDIDATES' already supplied to you. Responses marked on the Test Booklet or in any paper other than the answer sheet shall not be examined.
 - All items carry equal marks. Attempt all items. Your total marks will depend only on the number of correct responses marked by you in the Answer Sheet. There will be no negative marking.
 - Before you proceed to mark responses in the Answer Sheet fill in the particulars in the front portion of the Answer Sheet as per the instructions sent to you.
 - After you have completed the test, hand over the Answer Sheet only, to the Invigilator.

PRPL. (ITI) 2015

	[Maximum Marks : 100
1.	A hypermarket storeroom wants to store an SKU consisting of 5,000 cartoom
	on pallets each containing a maximum of 30 cartoons. They are to stored
	three high in the storeroom. How many pallet positions are required?
	(A) 56 (B) 167
	(C) 200 (D) 50
2	Which term is applied to the 'discount' offered by a supplier to encourage
	a consumer to purchase more items?
	(A) Trade discount (B) Credit discount
2.0	(C) Cash discount (D) Debit discount
3.	Which inventory records show continuously the quantity on hand for each
	item in the inventory ?
	(A) Periodic inventory records (B) Perpetual inventory records
	(C) Stock number records (D) Reorder point records
4.	Document showing part lists or building lists generated at the design stage
	is:
	(A) MRP (Materials Requirement Planning)
	(B) MPS (Master Production Schedule)
R-1	(C) MRP-II (Manufacturing Resources Planning)
	(D) BOM (Bill of Materials)
PRPL	L. (ITI) 2015—C 2

				100	356		
5.	The	e scientific technique for planning	ng the	ordering	and usag	e of mate	erial a
	var	ious levels of production is :			120		
	(A)	MRP	(B)	MPS			
	(C)	MRP-II	(D)	ВОМ			
6.	The	aim of value engineering is to	o :				
	(A).	find the depreciation value of	a ma	achine			
	(B)	determine the selling price of	a pro	oduct			
	(C)	minimise the cost without low	vering	the quali	ty of the	product	
	(D)	all of the above					
7.	In t	ime study, the rating factor is	applie	ed to dete	rmine :	£ 7,	
	(A)	standard time of a job			j		
	e de					7	
	. – .	merit rating of the worker					
	(C)	fixation of incentive rate				r v .x	4
	(D)	normal time of a worker			100	1	+2
8.	The	rbligs are used in :		* - +			
	(A)	Micro motion study	(B)	Operation	n process	chart	
	(C)	Flow process chart	(D)	None of	these	4 117	
PRP	L. (ITI	I) 2015—C 3		e A			Р.Т.О.

- 9. The main object of scientific layout is:
 - (A) to produce better quality of product
 - (B) to utilise floor area and space in an efficient manner
 - (C) to minimise production delays
 - (D) all of the above
- 10. The average activity duration in PERT is given by (where t_o = optimistic time, t_p = pessimistic time, and t_n = Most likely time):
 - $(A) \quad \frac{t_o + t_p + t_n}{3}$

 $(B) \quad \frac{t_o + 2t_p + t_n}{4}$

- $(C) \quad \frac{t_o + 4t_p + t_n}{5}$
- $(D) \quad \frac{t_o + t_p + 4t_n}{6}$
- 11. Which of the following are the guidelines for the construction of a network diagram?
 - (A) Each activity is represented by one and only one arrow in the network
 - (B) Dangling must be avoided in a network diagram
 - (C) Dummy activity consumes no time or resource
 - (D) All of the above
- 12. A-B-C analysis is used in :
 - (A) CPM

(B) PERT

(C) Inventory control

(D) All of these

13.	Wh	ich of the following is	not true	in tl	he context of depreciation ?
	(A)	It reduces income ta	x burden		
	(B)	It is an accounting pro	ocedure to	reco	ver expenses made on an asset used
		in the business			
	(C)	It is not charged on	land valu	ıe .	
	(D)	It is an amount due	to supplie	ers .	
14.	Whi	ich of the following me	thods of	econo	mic analysis will not use the pre-
	vail	ing interest rate ?			
	(A)	IRR	10 1 1 de 1 de 1 1 de 1 1 de 1 d	(B)	Present worth method
	(C)	Future worth method		(D)	Annuity method
15.	Whi	ch, out of the following	financial	instr	uments, is considered as the least
	risky	r ?			
	(A)	Bonds		(B)	Debentures
	(C).	Common shares		(D)	Preferential shares
16.	Redu	ection in labour by 25%	will cau	se la	bour productivity to improve by :
	(A)	13.3%		(B)	23.3%
	(C)	33.3%		(D)	35.3%
PRPL	(ITI)	2015—C	5		P.T.O.

- 17. Acceptance sampling can be used for those products that are produced by:
 - (A) Batch production system
 - (B) Mass production system
 - (C) Cellular manufacturing system
 - (D) All of the above
- 18. Breakdown maintenance consists of :
 - (A) Efforts to make the facility more available for production so as to have more of productivity
 - (B) Efforts to make the facility free from failure
 - (C) Efforts to restore facility to an acceptable operating level after breakdown
 - (D) Efforts to restore facility to an acceptable operating level before breakdown
 - Process control using control charts will lead to :
 - (A) Establishment of standards
 - (B) Measurement of performance
 - (C) Correction of deviations
 - (D) All of the above

20.	To enhance the reliability:
	(A) redundancy is provided in parallel
	(B) redundancy is provided in series
	(C) Both (A) and (B)
	(D) Neither (A) nor (B)
21.	The average weight of Arvind, Bala and Chandru is 50 kg, that of Arvind
	and Bala is 40 kg and Bala and Chandru is 38 kg. What is the weight of
i i	Bala ?
	(A) 6 kg (B) 16 kg
	(C) 36 kg (D) 35 kg
22.	A train 100 metres long is running at the speed 50 km/hr and another train
	150 metres long is running at the speed 80 km/hr in the same direction. How
	long will faster train take to pass the first train?
	(A) 20 sec (B) 30 sec
e As	(C) 40 sec (D) 50 sec

	15 is	
	0.77	
ï	(A)	11.25 (B) 28.50
	(C)	39.75 (D) 44.25
79.	The	multiplicative model:
: · *	(A)	uses centered moving averages to smooth the trend fluctuations
	(B)	removes trend before isolating the seasonal components
	(C)	deseasonalizes a time series by dividing the values by the appropriate
		seasonal index
	(D)	provides a unique seasonal index for each observation of the time
		series
		The state of the s
80.	Proc	cess layout :
	(A)	allows low variety and high volume mass production
	(B)	allows variety of products to be made on the same facilities
	(C)	has the dedicated facility leading to full automation
7	(D)	all of the alternatives are true
PRP	L. (IT	I) 2015—C 22

81.	A qualitative forecasting metho	d that obtains forecasts through "group
89	consensus" is known as the :	
	(A) Autoregressive model	
	(B) Delphi approach	
4.		
	(C) Mean absolute deviation	
	(D) None of the above alternative	and to account
	(D) Mone of the above atternation	ves is correct
82.	The trend component is easy to	identify by using :
	(A) moving averages	(B) exponential smoothing
7.4	(C) regression analysis	(D) 4 - D 1 1:
	(c) regression analysis	(D) the Delphi approach
83.	Fixed position layout is also know	771 918 :
3		
	(A) analytical layout	(B) none of these
	(C) synthetic layout	(D) static product layout
		(2) state product layout
84.	Military type of organisation is k	nown as:
	(A) functional organisation	
	(B) line organisation	
	other to	
400	(C) line and staff organisation	
	(D) line, staff and functional orga	anisation
*		
PRPI	L. (ITI) 2015—C 2	3 P.T.O.

The type of organisation preferred for a steel industry, is : line organisation (A) functional organisation (B) line and staff organisation (D) line, staff and functional organization Production cost refers to prime cost plus : 86. (A) factory and administration overheads factory overheads (C) factory, administration and sales overheads factory, administration, sales overheads and profit Work sampling is applied for : 87. (A) estimation of the percentage utilisation of machine tools finding out time standards, specially where the job is not repetitive and where time study by stop watch method is not possible estimating the percentage of the time consumed by various job activities all of the above 24 PRPL. (ITI) 2015—C

91.	In time study, the rating factor is applied to determine:
	(A) standard time of a job (B) merit rating of the worker
	(C) fixation of incentive rate (D) normal time of a worker
92.	A systematic job improvement sequence will consist of :
	(A) time study (B) motion study
	(C) job enrichment (D) all of these
93.	In inventory control theory, the economic order quantity is :
e	(A) optimum lot size
1	(B) average level of inventory
	(C) capacity of a warehouse
	(D) lot size corresponding to break-even analysis
94.	The procedure of modifying work content to give more meaning and enjoy-
	ment to the job by involving employees in planning, organisation and control
+7	of their work, is termed as:
	(A) job enrichment (B) job enlargement
	(C) job rotation (D) job evaluation
95.	Production cost refers to prime cost plus:
- 1	(A) factory overheads
	(B) factory and administration overheads
	(C) factory, administration and sales overheads
	(D) factory, administration, sales overheads and profit
PRPI	L. (ITI) 2015—C 26

	(A) inventory control (B) production schedule
	(C) machine repair schedules. (D) material handling
97.	The best strategy of minimizing the amount of safety inventory to be kep
	in a store without hurting the level of customer service is :
	(A) minimizing the uncertainty inherent in demand
	(B) minimizing the cycle service level
	(C) reducing the supply lead time
	(D) minimizing the uncertainty inherent in supply
98.	If the opening inventory is 400 units, purchased inventory is 900 units and
e Say	sold inventory is 500 units, what will be ending inventory?
	(A) 0 unit (B) 800 units
	(C) 1,000 units (D) 400 units
99.	Which document is issued by the purchaser when goods are delivered?
	(A) Delivery order (B) Sales order
	(C) Receive order (D) Purchase return
100.	Which document is used when stock items are taken from one warehouse and
	sent to another warehouse ?
	(A) Issue note (B) Posting note
	(C) Transfer note (D) Credit note
PRPL	(ITI) 2015—C 27 P.T.O.

96. Gantt chart is used for :
